

Competitive Edge Data Center Cloud Services

Straight from our data center to your business, Competitive Edge Cloud Services offers you a variety of hosted offerings designed to meet the continuity and data protection challenges of your business.

From server virtualization to data backup to full failover in the cloud, you choose the options that best suit your business' needs.

CEStore

Cloud Backup

Consider leaving cumbersome backups behind. We'll create backups of your business environment and store them in our data center. In the event of data loss on premise, Competitive Edge can restore the data from our data center.

Continuity-as-a-Service

Recovery time costs your business time and money in lost productivity. If you have virtualization, Competitive Edge can provide the availability to store your businesses virtual machines on our platform. And, in the event of a disaster, Competitive Edge will have your servers back online in a matter of hours to keep your business running.

Competitive Edge Cloud Services provides your business with security, flexibility, and reliability. Benefits include:

- Reductions in Capital Expenditures
- Decreased Downtime
- Improved Recovery Time
- Increased Operating Efficiencies

CESite

Virtualization

Server Virtualization Virtualize as many servers as needed. Introduce redundancy and high availability to your business critical services.

Environment Virtualization Get worry free IT by virtualizing all your servers in our data center. Competitive Edge Services manages and monitors all of your systems. Through environment virtualization, you can access your network anywhere in the event of a disaster.

Managed Collocation Services

With collocation services, your hardware and software is secured in our data center. Redundant power and Internet access insures you can run your business from anywhere at any time. The plan includes a certified technician in charge of your technology, proactively managing the configuration and updating software.
